

# Feedback on Wasl AI Hub

## Part 1

By Dana Alanazi

- 1- AI chatbot gives the following response even when you specify the bank is it on purpose?  
عذراً، حجم البيانات أكبر من الحد المسموح حالياً. جَرِّبْ سؤالاً أضيق نطاقاً (مثل بنك واحد بدل كل البنوك)
- 2- The presentation mode in the overview tab doesn't work. Is it on purpose?
- 3- When you click on the "save" button in the "Add Product" form while leaving it empty, it doesn't show an error message to the user indicating that the fields are required.
- 4- There is no input validation in the "Add Product" form: when I typed empty spaces it allowed it.
- 5- When you edit the product details and empty all the fields except the responsible person, it allows you. As a result you have a product with only the responsible person.
- 6- When you click on the "save" button in the "Add Meeting" form while leaving it empty, it doesn't show an error message to the user indicating that the fields are required.
- 7- There is no input validation in the "Add Meeting" form: when I typed empty spaces it allowed it.
- 8- When you click the trash icon button to "delete" an attachment from a meeting log there is no confirmation message shown to the user.

- 9- When you click the trash icon button to “delete” a meeting log there is no confirmation message shown to the user.
- 10- Show a meaningful error message to the user when they attempt to download a large file attachment. Also define the maximum file size allowed and define the formats allowed.
